## GIS Instructions to find addresses within 200' /300' of property boundary

Go to [www.lakegis.org](http://www.lakegis.org)

Go to LAKENAVIGATOR 3.0 (hover over it and click)

You will see five gray boxes- Click on the one with the envelope all the way to the right. A box pops up that will say **Buffer/Public Notification**. The first box says- **Select or search for a feature in the map**. Type the street number and street only (no extension i.e. Road, Street etc.) in this box. Next, check the box that says **apply a search distance**. It currently says 300'. (If you are in an R-50 district you will need to change this to 200'.) Then click the search icon (next to where you entered to address).

Scroll down with the thin gray bar to the right until you see the **DOWNLOAD** button. Click this button. At the bottom of your screen click open or save (depends on what version your computer program is).

Once you open the document in Excel the names may be squeezed together. You may need to adjust the columns. You will need to highlight all three columns A, B and C and then click the **FORMAT** button at the top right of your screen. This will bring up a drop down box. You can then click on **AutoFit Column Width**. Once you click this button you should see the entire list of names, addresses and cities with zip codes. You may also have to adjust your margins for the list to print properly.

If you need further assistance, please call the Lake County Auditor's Office at **(440)350-2534**.
